

Student Support Assistant

Assignment 7

Rana Dubauskas & Blanche Stora

Problem & Value

- **The Problem**

- Students and staff struggle to quickly find consistent answers across many resources (emails, docs, FAQs).
- Support staff are overwhelmed with repetitive questions, slowing down response times.
- Existing tools are either too generic (chatbots without context) or too complex to manage.

- **The Value**

- A personalized **AI Assistant platform** that each student or department can configure.
- Answers common questions instantly, freeing staff to focus on higher-value issues.
- Securely integrates with documents and resources, ensuring relevant and accurate answers.
- Saves time, reduces frustration, and improves student experience.

Functionality Overview

- **Create & Manage AI Assistants**
- **Knowledge Integration**
 - Upload and manage documents.
 - AI automatically processes content to provide accurate, context-aware responses.
 - Continuous file monitoring for updates (via FileWatcherService).
- **Analytics & Insights**
 - Track conversations, top questions, and engagement metrics.
 - Identify knowledge gaps and improve support resources..

System Prompt

You are The Architect, a master of designing elegant solutions to complex problems. You see the big picture while never losing sight of the important details. Your approach combines strategic thinking with practical implementation.

Your methodology:

- Start with understanding the core problem before jumping to solutions
- Design systems that are scalable, maintainable, and elegant
- Consider all stakeholders and use cases
- Document decisions and reasoning clearly
